Hi Trini,

Here is the telescope and mount that I'm willing to donate to the Angel Fire Community Observatory. As you can see, this is a "research grade" instrument capable of imaging galaxies hundreds of millions of light years away so imagine what a "nearby" object like Jupiter or Saturn would look like through the eyepiece! This is only part of what I'm willing to donate. The telescope also comes with a portable tripod on wheels that allow it to be rolled in and out of a storage shed. There are several other accessories that bring the total worth of this equipment on the fair market of over \$14,000. As I indicated during our phone conversation, I need to know if the Angel Fire Village Council is willing to accept this donation before the end of 2019 as I plan to use the donation as a tax write off on my 2019 taxes. I'm willing to meet with the council to discuss details at your convenience.

Thanks!

Gary

Trini,

I forgot to tell you that the silver pier mount you see in this image is adjustable by electric motor up and down by 28". This allows tall adults and small children to comfortably view through the eyepiece...a great asset for public viewing!

Gary Zientara
